
Borland C Builder V5.02 Professional.zip 64 Bit ^HOT^

ELF, PE, Mach-O, COFF, AR (archive), Intel HEX, and raw machine code are supported.

32-bit: Intel x86, ARM, MIPS, PIC32, and PowerPC 64-bit: x86-64 is supported. In addition, under Linux and BSD there is a GCC compiler based assembly (see help). A separate MSVC compiler is available for Windows. Programs in GNU Kernel Mode (GEM) are simple, fast and support multiple architectures. Although GEM is not a full

compiler, it provides the same capabilities: builds from source, compiles directly to machine code, has a good infrastructure, supports large amounts of data, and so on.
