Is there a way to check whether a file or directory exists in Python, so I can use it for my program? A: import os, stat os.path.exists(path) This checks if the path exists. A: import os, stat os.path.exists(path) #check if the path exists os.stat(path) #get info on the file/directory A: I've just learned about os.path.isdir(path) for the first time and it's pretty neat. Q: Accessing TextEdit in an NSOutlineView I have an NSOutlineView that I would like to edit text in the cell. I have overridden the "edit:" method" but can't seem to figure out how to get access to the cell's text view. I can get the row, and the item (which is the parent) of the row, but no luck on the cell itself. A: This is the way I get the text view in an NSTextField. I'm assuming you are trying to get the text view in a cell. NSArray *view = [outlineView cellForItem:item]; if ([[view subviews] count] > 0) { NSArray *textField = [[[view subviews] objectAtIndex:0] view]; if (textField.isEditable) { NSTextField *textField = (NSTextField *) textField; NSString *string = [textField.stringValue copy]; NSRange range = [string rangeOfString:@"someText"]; if (range.length > 0) { NSString *string2 = [string substringFromIndex:range.location]; 5b5f913d15

AutoCAD Crack

Open Autodesk Autocad and click on "File > Save" Go to "Save As", type a name like "apartment.dwg" and then click on "OK". Click on "File > Save as Type:" and type the extension to.dwg. Click on "Save" Now download the Free model of apartment.dwg and the property map.dwg and copy the maps and the model. Import your 3D building model into Autocad 2010. Go to "File > Open" and select the property map.dwg and open it. Go to "Edit > Select > Select Element" Choose the "Create Drawing" from the options In the Create Drawing window, click on "Modify" and then "Import" Navigate to the map and choose the apartment.dwg. The building is now ready for importing into your project. The steps are taken to import the 3D building model into Autocad. Click on "File > Save" Go to "Save As", type a name like "kitchen.dwg" and then click on "OK". Click on "File > Save as Type:" and type the extension to.dwg. Now you can proceed to the next step. How to create the kitchen plan To create the plan, use the following steps: Go to "Edit > Select > Select Element" Choose the "Insert" from the options Select the "Plan" from the options. Now a plan will be created, based on the 3D building model and the property map. Click on "File > Save" Go to "Save As", type a name like "Kitchen_plan.dwg" and then click on "OK". Click on "File > Save as Type:" and type the extension to.dwg. Now you have your final kitchen plan. How to create the room plans To create the room plans, use the following steps: Go to "Edit > Select > Select Element"

What's New In?

Import and import external markups automatically Accurately import and associate markups you create with external services such as Thingiverse. Placing blocks, arrows, text, and snap locations: Enter blocks faster, place arrows with more precision, and ensure that Snap and dimension text go with the rest of your drawing. (video: 1:15 min.) Convert object snap to XY modes Want to snap to every other object in your drawing? The new multi-selector tool allows you to convert an object snap to an XY snap, so you can place your objects with precision. Better editing: Edit your paths and curves more intuitively. Easily edit linked segments and control the flow of a path with the Spline Points tool. Numeric markers: See all your numeric markers at once. Plus, the new Numeric Marker window quickly shows the values of your numeric markers in a coordinate frame. Dynamic dimensions: Draw dynamic dimensions that update based on the scale of the drawing. (video: 1:18 min.) Document Compare: Compare two drawings side-by-side. Animate the changes, interact with edits with the intuitive timeline, and preview the entire change set simultaneously. Non-linear edits: Save and edit non-linear geometry, create spline series, and improve your drawing with the new geometric ruler. Arrows: Draw and edit arrows intuitively and quickly, with built-in color picker and node connection tools. Plumbing: Reorder, duplicate, edit, and split pipes with the intuitive pipelayer, plus create and edit connections between pipes, with the new Pipe Joiner tool. (video: 1:28 min.) Pressure: Pressure can be drawn in three ways: edge-to-edge, single, or nested. With nested pressure, pressure is based on the location and size of existing entities. Images: Load and organize a large number of images into the Style Library. Drag and drop images into objects, and quickly apply them to the drawing with the new image linking tools. (video: 1:33 min.) Measure and analyze: Create a new shape of interest and snap it to measure your drawing in easy-to-use tools. Hydraulic F
