This invention relates to a reflective composite material, and more particularly, to a reflective composite material including a transparent or translucent substrate and a layer of one or more coatings thereon. 2. Description of the Prior Art It is well known in the glass art to form a coating on a glass sheet or plate by fusing a coating composition to the sheet to form a coating thereon. The coatings so formed are used for a variety of decorative and protective purposes. It is also well known in the art to form a transparent

---

composite sheet material from a transparent substrate material and a reflective coating disposed thereon to provide decorative and protective qualities. The reflective coating may be formed of a metallic coating or layer. Generally, such composite sheets are formed of glass substrates, such as clear glass, treated for protecting the glass sheet and for providing a decorative colored coating thereon. e79caf774b
