The content of file.txt is like : [a-zA-Z]{1,} stuff [a-zA-Z]{1,} other stuff [a-zA-Z]{1,} yet another stuff [a-zA-Z]{1,} even more stuff [a-zA-Z]{1,} some more stuff I want a perl one-liner to extract all the stuff which has "stuff" in it. A: perl -ne 'print if /^\[a-zA-Z]{1,} stuff/' file.txt 1. Field of the Invention The present invention relates to a semiconductor device and a method of manufacturing the same, and more particularly to a semiconductor device and a method of manufacturing the same, in which a drain contact, a source contact and a gate contact are formed through a single self-aligned process, thereby reducing the number of manufacturing processes. 2. Description of the Related Art In general, a highly integrated semiconductor device is formed with a plurality of devices having different functions, e.g., a memory device, a logic device, etc., on a single semiconductor substrate. In a highly integrated semiconductor device, a channel length of a transistor is very short. Therefore, the threshold voltage of the transistor must be low. Accordingly, the semiconductor device requires a low threshold voltage transistor. In order to reduce the threshold voltage of the transistor, a method has been developed in which a retrograde well (hereinafter, referred to as "Retrograde Well (Rw)") is formed on the semiconductor substrate and the semiconductor device is formed. When the semiconductor device is formed, a source and a drain are formed

This is especially true when using the sniper rifle. I found that for the most part I was able to avoid most of the deaths. But, since you're playing a game that is based on your skill level, sometimes you're going to run into that issue. This game is definitely not for those who do not have a twitchy trigger finger. You have to get used to having
