You can get a Free Oracle Database 11.Prediction of flow and particle deposition in human nasal cavities. This study investigated particle deposition with respect to distribution of flow and blood velocity in the nasal cavity. The flow velocity and particle deposition were predicted by using CFD simulations. The results demonstrated that high deposition occurred under the nostrils and in the anterior area of the nasal cavity. It was found that the flow pattern and distribution of deposition can be different in the human nasal cavity when the subjects exhaled the particles, with different values of flow and velocities. Thus the near-wall-particle deposition patterns were described in a clear form by using two- and three-dimensional velocity and concentration distributions. The method is also available to investigate and compare the potential particle deposition in different nasal cavities when the subjects inhale and exhale the particles.Rama Joshi Rama Joshi, also spelled Rama Joshi or Ram Joshi (died 20 November 2012), was a Bollywood film actress who acted in more than 250 films.
